GCSE Maths – Revision tips

- **Make sure you learn the facts you need to know that aren't included in the formula sheet. Can you remember**

  - **the rule for the sum of interior angles in a polygon?**
  - **The exterior angle rule?**
  - **How to find the area of any triangle?**
  - **How to use the cosine rule to find angles?**

As just a few examples. Would flash cards help you?

- **The best way to learn Maths is to do Maths. Make sure you do lots of practice questions. Focus on topics you find difficult, and master a topic before moving onto something else.**

- **Use the resources and feedback documents given to you by your teacher to identify areas to practise further.**

GCSE Maths

If you aren't sure what to revise, or where to start, please talk to your teacher, or have a look in the pupil handbook.

Remember it is never too late to improve your grade
